

COGNITIVE & CONSTRUCTIVIST THEORIES

Jean Piaget: Active Construction

- Knowledge is actively constructed by the individual.
- 4 Key Factors: Maturation, Physical Exp, Social Exp, Equilibration.
- Core Concepts:
 - Schemas (mental models)
 - Assimilation & Accommodation
 - Clinical Method (focus on reasoning, not just answers)

Alison Gopnik: Child as Scientist

- Children are "born scientists" who test hypotheses.
- Broccoli Experiment: 18-month-olds understand differing preferences.
- Bickety Detector: 4-year-olds use trial & error to find causality.
- Overcomes Piaget's strict egocentrism views.

PERSONALISTIC THEORIES & MOTIVATION

Kurt Lewin

- Behavior = $f(\text{Person, Environment})$
- Leadership Styles (1939):
 - Autocratic
 - Democratic
 - Laissez-faire
- Founder of Action Research

Carl R. Rogers

- Nondirective facilitation
- Teacher as a guide creating a safe learning climate
- Student-centered learning
- Whole-person education (cognitive, emotional, physical)

Self-Determination

- Deci & Ryan (SDT)
- Intrinsic motivation requires three core needs:
 1. Autonomy (choice)
 2. Competence (mastery)
 3. Relatedness (connection)

ACADEMIC THEORIES & CURRICULUM

Hannah Arendt & Gert Biesta

- Arendt: School as a bridge to the public world; education as a conservative act protecting the world.
- Teacher authority comes from responsibility, not power.
- Biesta's 3 Dimensions of Education:
 1. Qualification (knowledge & skills)
 2. Socialization (traditions & values)
 3. Subjectification (autonomy & identity)

Curriculum Mechanisms

Curriculum is influenced by societal pressures:

- Direct: State regulations, mandatory subjects.
- Indirect: Standardized testing (PISA, CERMAT).
- Ideological: Political interventions (e.g., book bans).
- Structural/Shadow: Private tutoring causing inequality.

Critique: Often seen as elitist or detached from reality.

PERSONALISTIC THEORIES & MOTIVATION

Overview

- Focus on personality development
- Emphasizes intrinsic motivation
- Highlights the role of the social environment

KURT LEWIN

Interactionist Theory

- Behavior = function of Person and Environment.
- Leadership styles:
 - Autocratic
 - Democratic
 - Laissez-faire

CARL R. ROGERS

Nondirective Facilitation

- Teacher as a guide creating a safe, supportive learning climate.
- Encourages self-directed growth.
- Holistic approach to learning and personality.

SELF-DETERMINATION THEORY

Deci & Ryan

- Intrinsic motivation grounded in three core needs:
 1. Autonomy
 2. Competence
 3. Relatedness
- Fostering environments that support intrinsic drive.

ACADEMIC THEORIES & CURRICULUM

Overview

- Education as cultural transmission.
- Focus on intellectual cultivation.
- Explores the structures and foundational goals of formal education.

HANNAH ARENDT & GERT BIESTA

Purpose of Education

- Arendt: School as a bridge to the public world; education as a conservative act.
- Biesta's three dimensions:
 1. Qualification
 2. Socialization
 3. Subjectification

CURRICULUM MECHANISMS

Influences & Critiques

- Influenced by Political, Indirect, Ideological, and Structural mechanisms.
- Criticism includes elitism, intellectualism, and detachment from reality.
